WEAR VOL. 149 NOS. 1–2 SEPTEMBER 30, 1991

Contents

A model for friction in quasi-steady-state sliding
Part I. Derivation 1
J. Zhang, F. A. Moslehy and S. L. Rice (Orlando, FL, U.S.A.)

A model for friction in quasi-steady-state sliding
Part II. Numerical results and discussion 13
J. Zhang, F. A. Moslehy and S. L. Rice (Orlando, FL, U.S.A.)

Machining and wear relationships in an ordered intermetallic alloy 27
P. J. Blau and C. E. DeVore (Oak Ridge, TN, U.S.A.)

Adhesive and abrasive wear studies using acoustic emission techniques 41
R. J. Boness and S. L. McBride (Kingston, Ont., Canada)

On the particle size effect in slurry erosion 55
R. S. Lynn (Albuquerque, NM, U.S.A.), K. K. Wong and H. Mcl. Clark (Lawrence, KS, U.S.A.)

A comparative study of the slurry erosion and free-fall particle erosion of aluminium 73
J. B. Zu, G. T. Burstein and I. M. Hutchings (Cambridge, U.K.)

The influence of particle properties on the erosive wear of sintered boron carbide 85
P. H. Shipway and I. M. Hutchings (Cambridge, U.K.)

Transitions in the erosive wear behaviour of a glass ceramic 99
A. J. Sparks and I. M. Hutchings (Cambridge, U.K.)

A comprehensive model for the solid particle erosion of ductile materials 111
G. Sundararajan (Hyderabad, India)

The depth of plastic deformation beneath eroded surfaces: the influence of impact angle and velocity, particle shape and material properties 129
G. Sundararajan (Hyderabad, India)

Wear mechanisms of α-alumina lubricated with a paraffin oil 155
D. E. Deckman, S. Jahanmir and S. M. Hsu (Gaithersburg, MD, U.S.A.)

On the role of interfacial debris morphology in a conforming contact tribo-system 169
H. M. Hawthorne (Vancouver, Canada)

Influence of structural parameters on the slurry erosion resistance of squeeze-cast metal matrix composites 187
S. Turenne, D. Simard and M. Fiset (Boucherville, Que., Canada)

On microscopic mechanisms of friction and wear 199
D. E. Kim and N. P. Suh (Cambridge, MA, U.S.A.)

The influence of surface finish and strain hardening on near-surface residual stress and the friction and wear behavior of A2, D2 and CPM-10V tool steels 209
R. A. Poggie and J. J. Wert (Nashville, TN, U.S.A.)

The role of soft (metallic) films in the tribological behavior of ceramic materials 221
O. O. Ajayi, A. Erdemir, R. A. Erck, G. R. Fenske and F. A. Nichols (Argonne, IL, U.S.A.)

The influence of contact zone kinematics on wear process of polymers. 233
B. J. Briscoe (London, U.K.) and T. A. Stolarski (Uxbridge, U.K.)

(continued on inside back cover)

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Printed in The Netherlands

INSTRUCTIONS TO AUTHORS

Submission of papers

Three copies of papers should be sent to
Editorial Office (U.K.) of Elsevier Sequoia, Mayfield House, 256 Banbury Road, Oxford OX2 7DH, U.K.

Contents *(continued)*

Tribology of aluminum metal-matrix composites: lubrication by graphite 241
S. V. Prasad and B. D. McConnell (Dayton, OH, U.S.A.)

Friction and wear behaviour of 18 polymers in contact with steel in environments of air and water 255
J. W. M. Mens (Apeldoorn, The Netherlands) and A. W. J. de Gee (Enschede, The Netherlands)

Simulation of solid lubricants and contact spots between Bridgman anvils Part I. A new high pressure apparatus 269
B. C. Cai, D. Kuhlmann-Wilsdorf and R. B. Nelson (Charlottesville, VA, U.S.A.)

Simulation of solid lubricants and contact spots between Bridgman anvils Part II. Experimental results on f.c.c. metals and new insights gained 279
B. C. Cai, D. Kuhlmann-Wilsdorf and R. B. Nelson (Charlottesville, VA, U.S.A.)

On the tribological behavior of adsorbed layers, especially moisture 297
C. Gao, D. Kuhlmann-Wilsdorf and M. S. Bednar (Charlottesville, VA, U.S.A.)

Observation of the wear surface by scanning tunneling microscopy 313
A. K. Gandopadhyay, M. P. Everson, R. C. Jaklevic and P. A. Willermet (Dearborn, MI, U.S.A.)

Wear modelling: using fundamental understanding or practical experience? 325
M. Godet, Y. Berthier, J. Lancaster (Villeurbanne, France) and L. Vincent (Ecully, France)

Friction and wear of polyethylene–nylon blends..... 341
H. Yelle, H. Benabdallah and H. Richards (Montréal, Qué., Canada)

Sliding friction and wear of metals in vacuum..... 353
T. Akagaki and D. A. Rigney (Columbus, OH, U.S.A.)

Friction and wear behavior of TiN in air: the chemistry of transfer films and debris formation 375
I. L. Singer, S. Fayeulle and P. D. Ehni (Washington, DC, U.S.A.)
